SQL, Systemd, Crontab, Vim,
Gpg, Rsync, Syslog, Make,
dpkg, rpm, yum.

Personal
Here You can find:
Dotfiles, scripts, tools
and other usual projects.

ABOUT ME

I studied DevOps,
continuous development,
infrastructure and more.

My long professional
experience has allowed me to
learn soft and technical
skills that I intend to make
the most of by adding my
training to achieve a solid
IT profile.

I really like the
simplicity, in my personal
life, in my work, when I
cooking, everytime my
philosophy is **less is more.**

I enjoy much the board
games, hiking in the
mountain and people that
push You upward.

EDUCATION

EducacionIT 2022 – online
DevOps
Culture, Agile Development, Continuous Integration

Scrum
fundamentals, User history, Sprints, Backlog, Daily, etc.

Python
Programming bases
Build console and graphics programs

Software & Hardware Troubleshooting
Virus, malwares, Windows processes & regedit.
Powershell, scripts & work automatization.
Operative system installation and computer assembly.

PROFESSIONAL

A short tour through 7 years of
experience in telecomunication industry.
In 2015, **Celplan** was my first company.
Here I learned about the high altitude work, the
electricity and the **Kaizen method for organization
and continuous improvement**. In 2017 I started in **Incoes**
for the maintenance when I was focused in work planning
communication with the customer and deployment of new
technologies. After four years of work in Buenos Aires,
I decided to travel to know the rest of the country,
and in 2019 I started to work in **Selecsa** in Rosario,
Santa Fe. It was a challenge for me to be **team leader**
in the work group, this taught me **communication,
management** and how to create a **good work spirit.**
Finally in 2020, I worked in **Capitulo 12** in
radio link deployment where I developed
work autonomy and my skills in **network,
satellite** and **radio connections**

Curriculum Vitae: Spanish, French
